Stansted Business Park
Stansted-Essex CM24 1AF
United Kingdom.

Dear Sirs,

Thank you for giving us the opportunity to review your Gamit Aviation Division Data handling system. The example you have provided, Rolls- Royce engine RB 211-535E4 S/N, is a good demonstration of the system capabilities.

Your system provides an organized way to electronically store massive amounts of information which can be readily accessed and retrieved. This method is ideal for any aviation related organization that has to maintain and keep all the records for their products for future retrieval by their staff, government agencies or customers.

After reviewing this product, PCA is in a position to recommend using this method for retrieving information for any of our clients; air operators, repair/maintenance organizations or OEM's.

If you have any queries regarding our evaluation please do not hesitate to call us.

Best regards,

Capt. Mohamed R. Berenji, D.Sc.
Vice President
Aviation Standards and Safety Department
